Dear Esteemed Professor Sifakis,

I am writing to inquire about the possibility of obtaining access to the source code for the "[BIP-to-NuSMV transformation tool](#)". My intention is to employ it for academic purposes and to pursue further development.

Yours sincerely,

Atefeh

Atefeh Zareh Chahoki

Dear Atefeh,

If memory serves, this version has been developed by Dr Wang Qiang (cced) who may own the source code.

Best regards,

js

Dear Joseph,

Many thanks. Looking forward to hearing from Wang Qiang.

Best regards
Marco

Dear Marco,

Sorry for the late reply.

I have checked my previous laptop. Unfortunately, I cannot find the source code now, after changing the workspace many times in the past years.

It would not be too difficult to implement the translation. If you need any further help in doing this, please let me know.

Best regards
Wang Qiang

Dear Joseph and Wang,

I appreciate your responses and assistance. As per your response, the issue is not related to access or copyright concerns but rather to the code being lost due to the workspace changes. So, could you please confirm that there are no copyright concerns if we proceed with decompiling the JAR file to kickstart a new project for our ongoing development? Our intention is to make it available to the open-source community for further support and development.

Thank you for your support and cooperation.

Best regards,
Atefeh

Dear Atefeh,

Thank you for your interests. Yes, you can decompile the JAR file. There is no copyright concern on my side.
Please also share the link with us once you make it open source.

Best regards
Wang Qiang
