Hi Atefeh,

The project was done as part of my internship at EPFL in 2013, supervised by and in collaboration with Dr. Jaber and Dr. Qiang. It was never open sourced, and hasn't been maintained since.

I had previously published a small guide on usage and limitations, but I'm unable to find it now as it is on the EPFL internal wiki. I doubt I remember enough to recreate it.

Please feel free to modify/publish the code as you see fit.

Wajeb
